

HAMZA SAIFUDDIN

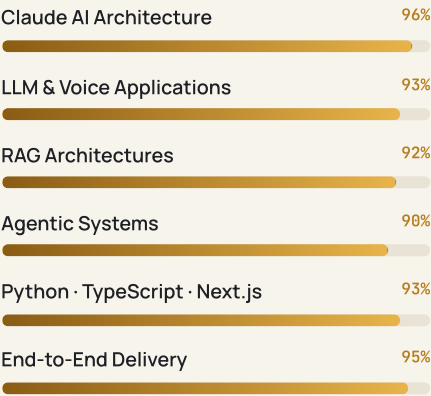

AGENTIC AI ARCHITECT · PYTHON & LLM SPECIALIST

I architect autonomous AI workforces — agents, digital FTEs and production LLM applications that sell, support and scale businesses worldwide.

EDUCATION

AI Engineering — PIAIC / GIAIC
2026 · Presidential Initiative for AI
Production AI pipelines, RAG architectures, context engineering & agent-factory patterns.

B.Com — University of Karachi
2024 · Grade A
Business foundation powering product-manager instincts.

UrduNATIVE

ENGAGEMENT

- ◆ Full-Time · Contract · Project-Based
- ◆ Remote · Global timezone overlap
- ◆ Free 30-min consultation

PROFILE

Engineer-founder who owns the entire lifecycle: **strategy** → **architecture** → **code** → **deployment** → **growth**. Founded and shipped a production marketplace serving real users, then went deep into agentic AI — LLMs, RAG systems and autonomous agents built on **Claude AI** and the **OpenAI Agents SDK**. Businesses hire me when they want intelligence that acts, not demos that impress. I don't hand off — **I ship**.

EXPERIENCE

Agentic AI Engineer — Freelance · Global

2025 — PRESENT · REMOTE

- ▶ Designed & deployed **25+ autonomous agents** ("digital FTEs") — sales, support, WhatsApp & voice agents running 24/7 in production.
- ▶ Built custom LLM applications end-to-end: RAG pipelines, evals, guardrails, streaming UX and cost-optimisation at scale.
- ▶ Delivered AI-first MVPs for startup founders — validation to investor-ready demo in weeks.
- ▶ Deployed on Vercel, AWS & Azure with observability and human-in-the-loop control.

Founder & AI Architect — Pakhunar.com

2025 — PRESENT · KARACHI, PK

- ▶ Architected & shipped Pakistan's leading skilled-services marketplace — **30+ live categories**.
- ▶ Next.js + TypeScript platform with LLM-powered search and WhatsApp integration.
- ▶ Own product strategy, engineering, deployment and growth as a solo founder.

SYSTEMS I BUILD

◆ Autonomous Agents

Reason-plan-act loops with tool use, memory & human-in-the-loop control — agents that finish the job.

◆ Digital FTEs

AI employees owning a full role — trained on your SOPs, wired into your stack, reporting like a real hire.

◆ LLM Applications

Production-grade RAG, copilots & AI SaaS — fast, accurate and affordable at scale.

◆ Startup Ideas → MVP

Validation, architecture and an investor-ready AI MVP shipped in weeks, not quarters.
